

Introducing Pagecopy™ – the feature you've been waiting for...

Never Miss A Message?

For mission critical messages the name of the game is back-up and redundancy. That is why we at American Messaging are introducing Pagecopy™.

What is Pagecopy™?

Pagecopy™ takes all of your incoming pages and duplicates them on an unlimited number of devices of your choice, such as cellular text messages or email.

Too simple, right?

So what does this mean to you?

- > **Backup** – You are one page away from a life or death emergency. Pagers are amazingly reliable but humans are not. Maybe you forgot your pager momentarily on the bathroom sink. With Pagecopy™ you can duplicate all of your pages to another device, i.e. your cell phone, or even another person's device – redundancy saves lives.
- > **Save the Data** – Ever delete a page you needed to read again? Pagers only hold 16 to 32 pages at a time – maybe you want to review a page from last week, last month or last year. Never lose a message again.
- > **Reporting** – You are responsible for preparing reports. A record of your pages in your email inbox, their dates, times and content are invaluable for reconstructing an emergency report.
- > **Out of Coverage** – You are on a business trip in another state. Use Pagecopy™ to duplicate your pages on your cell while you are gone.
- > **Notify Secondary Responders** – Your Code Teams need instant notification by pager. Now administrators or anyone on a "need to know" basis can have your emergency page copied to their phone or email. Only Pagecopy™ lets you copy an unlimited number of addresses or devices.
- > **Vacation** – With Pagecopy™, leave your pager in the drawer at home. At your leisure, you can check your cell phone if you want to keep up. And once you return home, check your pager and you are up to speed immediately.

As a First Responder, you know the value of back up and redundancy. Now you can never miss a message again for less than you spend on a cup of coffee per month.

Yes, we know you've been needing Pagecopy™ – now it's here.
