

Vehicle Mount and Power Supply

The RAVENAlert can now become a portable emergency system. By providing a mounting system, and a vehicle power supply, the RAVENAlert units are ready for mobile applications.

RAVEN Systems uses a high strength composite dash mount from RAM mounts. The mount consists of a 1" diameter ball and socket joint. "Clip in" and permanent mounts are available.

Also, available is a mobile power source. This power converter allows the RAVENAlert to have a "hard-wired" power source directly from the vehicle. This is pre-assembled

KEY FEATURES

- Provides complete RAVENAlert mobility for FIRE and EMS vehicles
- High strength composite mount
- Extremely reliable power supply
